LATIN AMERICA

Various forestry, nature conservation and watershed management
Programmes. (Sida, UNOPS, IDB)

ZAMBIA

Land Management and Conservation Farming (1994-2003)

APPROACH TO RURAL DEVELOPMENT

- No by-pass, work through the existing system and improve it
- Popular participation, but with a material content
- Ownership/user rights to land as an entry point
- Soil and water conservation too narrow – land management for food security and cash income
- Priority to gender issues – but with a practical approach
- Practical, problem solving project management
